CROCODILE M - KILL

Mold and Algae Killer

“Excellence in mold and algae removal, moisture reduction”

Usage Area

Waterborne biocidal wash used for killing Mold and Algae with 100% efficacy. Safe for users. It can use for reducing moisture by applying directly onto cement substrate. Suitable for all kind of substrate. It can be paint over. Preventive, long lasting, and reducing the damage caused by Mold and Algae.

Application Instruction

Substrate Preparation

Clean the substrate by water. Remove Mold and Algae by plastic brush or high-pressure water jet. Final cleaning all dirt by water. Leave it to dry before applying the products.

Application

1 Clean the substrate by high-pressure water jet. Mold, algae, paint flakes should also be removed.

2 Apply 1 coat by brush or roller onto substrate without dilute by Thinner or any solvents.

3 Leave it to dry 3-4 hours.

4 Paint over.

Estimated Coverage

35-40 m²/gallon/coat. It depends on the type and condition of the substrate. The exact consumption must be determined by the means of a sampling of the work.

Packing

- 5 liters (gallon)
