- Both interior and exterior usage.
- Start using in 4 hours, complete drying in 24 hours**
 - * If collapsing occurs, add 1 more grout.
 - ** Completed drying in 24 hours.

Color : White

Installation

Preparation

Clean any dust, dirt, debris remaining in the joints. Be sure there is no water or moisture around the grouting area.

Application

- Squeeze or massage the grout tube before using.
- Cut the tip of the bulb.
- Squeeze the grout into the joint line and use a rubber face trowel or finger to fill in the gap.
- Wait 15-20 minutes before cleaning off the excess grout with a damp cloth.
- The grouting area is available within 4 hours after applied. Protect the area that is not exposed to moisture for 24 hours.

Cleaning

Possible to remove the excess grout with water before it is completely cured.

**Estimated Coverage**

1 tube / 200 ml / 30 meters (3 mm width, 3 mm depth)

Technical Data

Density	1.60 g/cm ³
Drying time	4-24 hours *

* Drying time depends on the surface, thickness, temperature, and humidity

Using restrictions

- Should be used under the temperature of 5-35°C.
- After grouting, keep it dry and away from water for 4 hours.
- Should not be used when there is high humidity as it will prevent the grout from improperly drying.
- Not suitable for swimming pools or areas with waterlogging.

Caution

- May be harmful to the eyes, skin or lungs. Wear suitable protective clothing, gloves, and eye/face protection.
- In case of any allergy, consult a doctor. After skin contact, immediately rinse with water.
- Keep out of reach of children.
- Should not be taken into the mouth.

Storage

- Keep in the shade, dry, not humid, and ventilated place (If not all used in one time, close the lid tightly).
- The shelf life is 36 months in unopened condition at a temperature of 30-35°C.

Packing

Net weight : 200 ml / Tube
