

# Jorakay Easy Bathroom Anti Slip

## Bathroom Anti Slip

The anti-slip solution creates friction on wet tiles effectively. It is used particularly for tile surfaces, except gloss tiles. It leaves no chemical residue. It can be used for indoor and outdoor surfaces, or areas with a high risk of slips and falls, such as terrace or bathroom.

## Product features

- It can be used with any type of tiles, except for gloss tiles.
- Its anti-slip property earns the DCOF standard equivalent to R11 tiles or above.
- Its anti-slip property lasts as long as a year.

## Recommendations

\* Recommended to clean the surface regularly because it may become slippery again due to soap, shampoo, or other stains that occur later. The more frequent you clean the longer friction lasts.

## Application

1. Test the product in a small area before use.
2. Apply Jorakay Easy Bathroom Anti Slip on a sponge only and soak the target area.
3. Wait for 45 – 60 minutes. (The solution on the surface must be damp throughout the 45 minutes.) If any part is dry, reapply the solution.
4. After the specified time, flush off with clean water. The solution will be fully effective.
5. Test regularly or at least every 6 months. If the anti-slip property is found lower, repeat the process. (The anti-slip effect is guaranteed for 6 months by average).

## Application ratio

Approximately 5 sqm.

### Key ingredients

- Phosphoric Acid 3-5%
- Ammonium Bifluoride 1-3%
- Alcohol C9-11 Ethoxilate 1-2%

### Precautions

- Test in a small area before applying.
- Always wear protective gloves and goggles when using and avoid direct contact.
- The tile colors and gloss may be slightly lower due to chemical reactions of the solution. It may lighten the color of dark tiles, such as black or dark blue. (Users should test whether they are satisfied with the results.) However, the anti-slip property remains.
- Do not pour the solution on the tiles directly. Pour it on a sponge and apply the solution on the surface only.

### First Aids

- **Eye** Wash the eye with plenty of water immediately. Roll the affected eye up and down. If the patient wears contact lens, remove it carefully. Wash with water continuously for 20 minutes. Seek medical attention.
- **Breath** Evacuate the patient to a well-ventilated area. With presence of chemical smog, wear a protective mask. If the patient becomes unconscious, position the patient to breathe easily and unbutton the shirt or remove the necktie to facilitate breathing. Evacuate the patient to a well-ventilated area and seek medical attention immediately.
- **Skin** Wash the solution from skin with plenty of water. Clean the contaminated clothing with water. Always wear gloves when cleaning. Clean with water for 20 minutes. Wash the affected clothing and shoes before wearing them again.
- **Swallow** Remove artificial teeth, if any. Drink a reasonable amount of water. Stop drinking water if the patient wants to vomit. If the patient vomits, keep the head low to prevent the solution from entering the lungs. Do not put any object in the patient's mouth. If the patient becomes unconscious, evacuate to a well-ventilated area, unbutton, and seek medical attention immediately

### Storage

Store in a secure place, away from children, food, and pets. Keep away from sunlight. Can be stored at room temperature.

### Packing

220 ml. / bottle
