Waterproofing ROOFTOPS

Preventing Water Leaks

CROCODILE FLEX SHIELD

Flexible Waterproofing Cement 1K

- Easy to use, just mix with water
- High adhesion strength
- Excellent waterproofing
- Highly flexible; optimized for flexible surface
- Vibration-resistant
- Can be applied like painting, dip, and roll

- For waterproofing of the water tank, reservoir or swimming pool -

CROCODILE FLEX SHIELD

Flexible Waterproofing Cement 1K

“Waterproofing rooftops, preventing water leaks”

Application Instruction

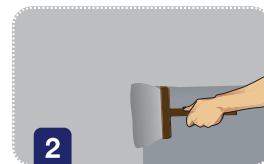

Substrate Preparation

- Clean the surface to be free from dust, concrete scrap, oil and unknown matter etc.
- Fill cracks if any on the surface with suitable repairing material. Fill wall border or joints with sealant.
- The concrete surface must be damp but with no wet sheen on the surface.

Application

1
Apply on the surface with brush or roller twice.

2
The second coat should be applied in perpendicular of the first coat, allowing 30-90 minutes apart between each application.

3
When finished, surface should be left to dry for at least 3 days.

4
The surface should be left to dry for at least 3 days before tiling.

For area with permanent contact with water, the surface should be left to dry for at least 7-14 days for optimal performance.

Estimated Coverage

- 1-1.5 kg / sq.m / 2 coats

Packing

- 1 kg (bucket)
- 4 kg (bucket)
- 20 kg (bag)

Color

- Grey / White / Black / Blue / Green

Product Information

Usage Area

Crocodile Flex Shield is flexible waterproofing cement with one component. It is easy to use, just mix with water. It can adhere with the rooftop concrete instead of merely coating like others, by just applying CROCODILE FLEX SHIELD all over the roof top, it can create a highly durable waterproof shield for it. It is highly flexible; optimized for flexible surface, weathering and UV radiation resistant. Even waterproofing and protecting a water retaining structures, such as drinking water tanks, reservoirs, water mains and swimming pools, it can stay waterproofing for decades without flaking or leaking. Therefore, rest assured that when applying on the rooftop, water will not seep through.
