CROCODILE PU FOAM

PU Expansion Foam

- Excellent filling capacity
- High thermal & acoustical insulation value
- Excellent adhesion on most substrates
- Does not contain any propellant gases that are harmful to the ozone layer
- Excellent mounting capacity and stability
- Can be cut and painted after curing

- For cement, concrete, wood, glass, plastic, etc. -

CROCODILE PU FOAM

PU Expansion Foam

“Gap filing, 5-time expansion, excellent stability, no shrinkage”

Usage Area

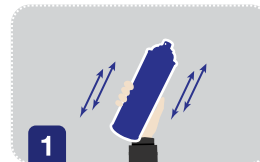

Crocodile Pu Foam is a single-component, moisture-curing and self-expanding aerosol polyurethane foam. It is good for filling void, pore, joint or cracks in construction, decoration, or general repairs. Easy to use, high thermal & acoustical insulation value. Excellent adhesion on most substrates such as cement, concrete, wood, glass, plastic, etc. Can be used for both interior and exterior. It is designed for easy dispensing through the straw adapter included with each can.

Application Instruction

Substrate Preparation

- The substrate must be clean, dust-free and without any traces of oil, laitance, curing compound etc.

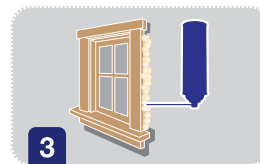

Application

1 Shake the aerosol can for at least 20 seconds.

2 Put the straw on the valve. Turn the can upside down and spray (keep the can upside down during spraying)

3 Fill holes and cavities for 50%, as the foam will expand.

4 Trim the cured foam by cutter.

5 After use, clean the nozzle and straw with acetone-based solution.

Packing

- 500 ml
